

MySudo

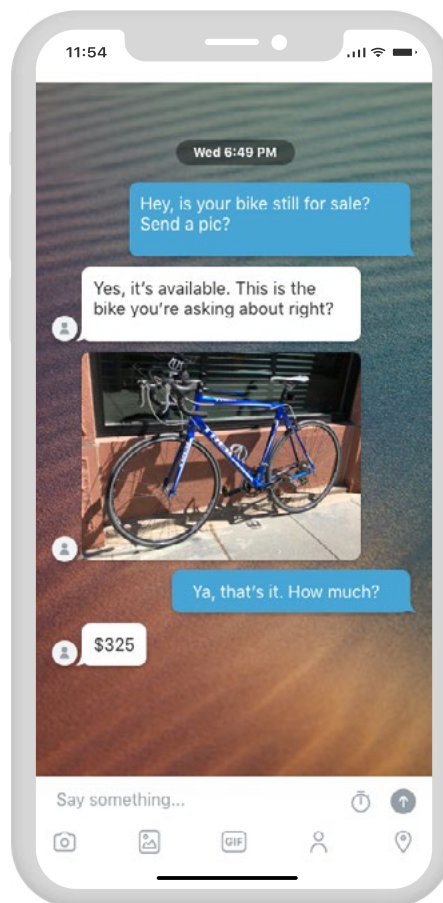

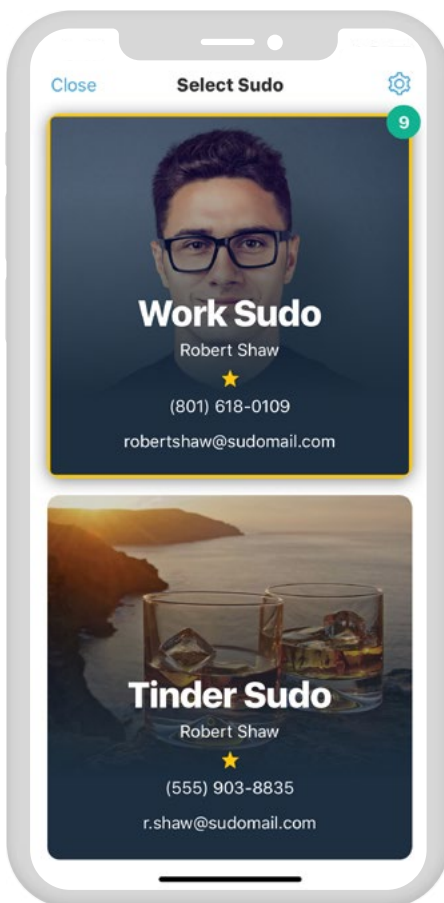

MySudo is the future of digital safety and security. Create profiles called "Sudo identities" that act as a shield for your personal information.

Instead of having to share personal and private information, MySudo gives you complete privacy and control over your personal information while searching, shopping, selling and socializing. With MySudo, anyone can manage and compartmentalize all of their roles and responsibilities, both online and off, while protecting themselves from hackers, trackers, and online threats.

Each MySudo can be personalized with a profile name, phone number, email address, browser, and virtual payment method, all without revealing one's personally

identifiable information (PII). Whether used on a temporary or permanent basis, a Sudo blocks data miners and hackers attempting to harvest and exploit your PII and everyday activity and puts the user in control of their digital safety.

The MySudo app requires zero personal information from users for registration, has zero knowledge of a user's content, and never serves ads. All in-app communication is 100% free and secured with end-to-end encryption to maximize the safety and privacy of our users.

Use cases

My Rewards Sudo

"I use a Sudo identity to organize all my rewards and loyalty points; places like Walgreens, Safeway, and OpenTable now aren't spamming my phone or filling my personal in box."

My CarMax Sudo

"I used a custom Sudo when I bought my car and shopped for car insurance last month. Then I deleted it. I definitely don't miss all the spam I was getting and never get robocalls."

My Dating Sudo

"I have a unique Sudo for online dating to keep my phone number private until I find my perfect match."

My Craigslist Sudo

"When I recently sold my bike, my Craigslist Sudo was the perfect way to facilitate meet ups without giving out my mobile number to strangers."

My Spam-Killer Sudo

"I use one of my Sudo identities for any random thing, like one-time services, subscriptions or purchases where they want my email or mobile number. All the resulting sales calls and spam just go to that one Sudo which I never check, and can just delete anytime I want. What a relief!"

Features

- Up to 9 custom Sudo identities for every aspect of your digital life
- No user registration or login for zero attribution, hacks, or spam
- Free and unlimited in-app calling, texting, and email
- Supports in-app and out-of-app calling and texting
