MySudo VPN

Powered by Anonymome Labs™

MySudo VPN is a standalone product from Anonymome Labs, a privacy and identity protection company trusted by Fortune 100 companies, backed by more than 22 issued patents, and building innovative proactive privacy and identity protection solutions for enterprises and consumers for over a decade.

About MySudo VPN

A zero-log encrypted VPN with servers in 41 countries that never asks for your name.

MySudo VPN creates an encrypted tunnel for all your internet traffic. It hides your IP address, protects you on public Wi-Fi, and lets you access content from other regions. Where most VPNs still ask for a username and password to sign in, MySudo VPN doesn't. Your account is tied to a key that never leaves your device. No name. No email. No phone number required to connect.

No logs are kept. No usage data is sold. The only data collected is a random registration ID and your account status, the bare minimum needed to run the service.

What MySudo VPN Looks Like in Practice:

On public Wi-Fi at an airport, hotel, or café, your traffic moves through an encrypted tunnel no one on that network can read. What you do online stays private regardless of the network you're on.

Traveling abroad, you connect through servers in 41 countries. Whether you're accessing region-specific content or just want an encrypted connection while you're away, MySudo VPN handles it without logging where you were or what you did.

Working remotely, your connection is secured whether you're at home, in a coworking space, or anywhere else. No one watching the network sees your traffic and neither does MySudo VPN.

"If a VPN needs your identity, it's not private."

The Product

MySudo VPN is available on iOS, Android, and desktop. It's available in AU, CA, DE, NZ, SG, KR, UK, and US. It runs across 76 servers in 41 countries and supports WireGuard, IKEv2, OpenVPN UDP/TCP, and IPsec. AES-256 encryption, the same standard used to protect classified government data, secures every connection. Syncs across devices with no ads.

Plans and Pricing

Plan	Price
MySudo VPN Monthly	\$6.99 / Month
MySudo VPN Yearly	\$49.99 / Year

Zero-Knowledge Architecture:

MySudo VPN is designed so Anonymome Labs never needs to know who you are or what you do online. No usage logs. No IP storage. No data sold. Privacy in practice, not just in policy.

MySudo VPN is part of the MySudo Suite, alongside MySudo, MySudo Reclaim, and MySudo Password. Each product is independent, with its own plans and pricing. They're designed to work even better together.
